nightjet

EXPLORE EUROPE AND PROTECT THE ENVIRONMENT

The ÖBB Nightjet offers eco-friendly overnight travel to Europe's most beautiful cities and enables passengers to save both time and accommodation costs. Hop on the train in the evening and make yourself comfortable – simply lean back and enjoy the comfort, either in a compartment with other passengers or in a private compartment just for you, your friends and family. After a hearty breakfast*, the following morning you will arrive right in the city centre of your destination and can set about your day straight away.

This means you can travel in a relaxed, eco-friendly way – and in your own compartment if so desired – with more time to spend in your chosen destination.

** in couchette and sleeper compartments*

Couchette

Sleeping car comfort

Comfort categories and services

As you travel through the night, you can rest in a seat, couchette or sleeping car depending on your preferred level of comfort.

SEAT CAR

The seat car is the **most affordable way** to travel on an ÖBB Nightjet. Passengers travel in a **compartment** for up to 6 people or in a **standard class open coach**. There are washrooms/toilets in every car.

Private compartment in a seating car

On many connections, up to 3 people (min. 1 adult) can book their own seating compartment at a flat rate (limited number available).

COUCHETTE CAR

A **couchette compartment for 4 to 6 people** is ideal for **groups, families or cost-conscious solo passengers**. There is no gender separation, but dedicated **ladies' compartments** can be booked.

Each bunk comes with a blanket, a sheet and a freshly changed pillow. Washrooms and toilets are accessible in every car. Upgraded **comfort couchette** coaches with e.g. newly designed fixed beds, a modern accessible compartment and toilet, three bicycle stands, free Wi-Fi and other technical innovations are gradually being introduced on many services.

Private compartment in a couchette car

For more privacy, you can book a private compartment for up to 6 people travelling together at a flat rate (1 to 3 adults, max. 5 children up to 14 years; limited availability)

MINI CABIN

The **mini cabin** in the new-generation Nightjet with its innovative cocoon concept is the perfect travel option for solo travellers looking for privacy.

The ticket price for a couchette berth in a compartment or a mini cabin includes the reservation, mineral water and breakfast in the morning. Additional drinks and snacks may be purchased through the on-board service team.

SLEEPING CAR

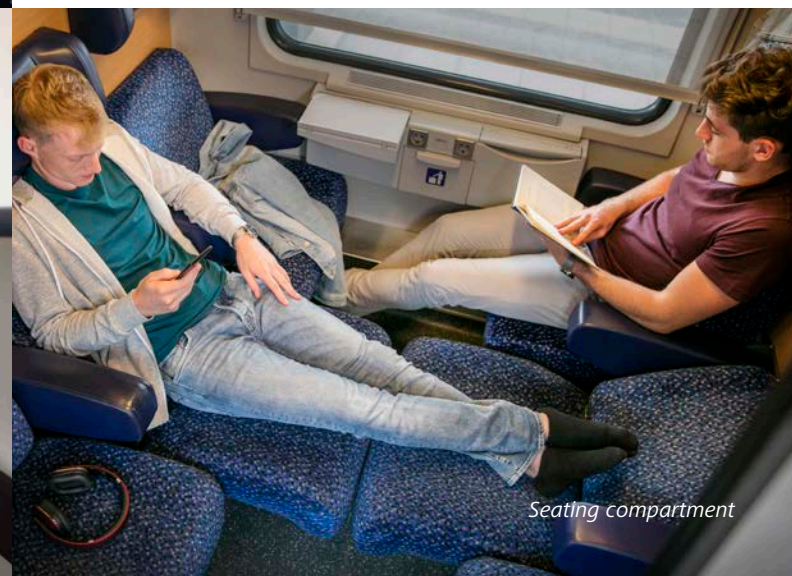

The **most comfortable way to travel** on an ÖBB Nightjet is in a sleeping car. The compartments can be booked for 1 to 3 people and offer made-up beds, an à la carte breakfast and private washing facilities or, in the **plus compartments**, a private shower and toilet. The new **comfort compartments in the new-generation Nightjet** are designed for 1 or 2 people and each have their own bathroom with a toilet and a shower facility, or a shower in the **comfort plus** category. You can also expect a contemporary design with fixed beds, a retractable table, compartment locking using NFC cards and individually adjustable ambient lighting.

The **ticket price for a bed in a sleeping car** includes free access to the ÖBB lounges, mineral water, a snack and a welcome drink on the train in the evening and an à la carte breakfast in the morning. You can order additional drinks and meals from the menu (not included in the ticket price), which will be served in your compartment.

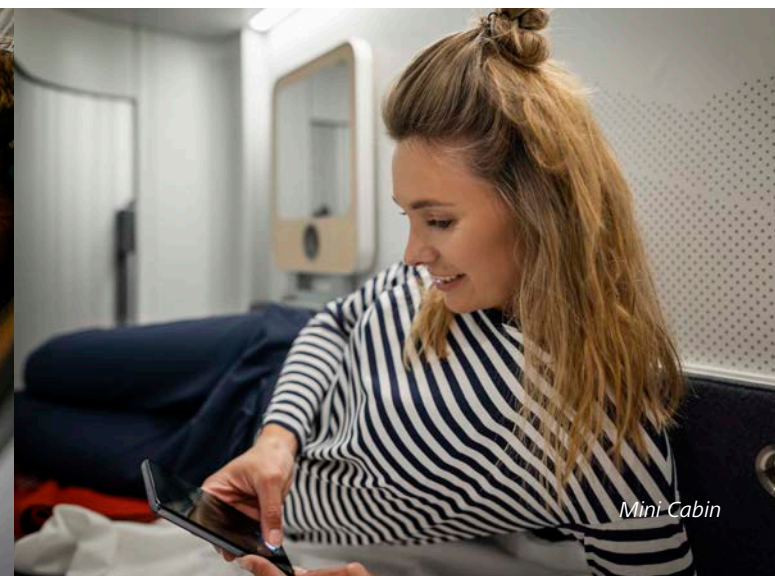

The services offered on and coach composition of **EuroNight trains and other railway companies** may differ from the offering presented by ÖBB Nightjet.
